# Seamless Splunk Integration

Real-Time Threat Detection Validation with AttackIQ Flex

Threats are evolving and detection is your last line of defense.

Outdated detection rules only alert on a small fraction of adversary behaviors and organizations need a way of ensuring their controls can catch them. Flex is the answer. Validate threat detection instantly with AttackIQ Flex and agentless SIEM integration.

- **Agentless Detection Validation**
  Continuously identify detection gaps across all devices without requiring agents.

- **Seamless Splunk Integration**
  Direct integration with Splunk, allowing for centralized detection insights and a streamlined user experience.

- **Immediate Detection Insights**
  Gain visibility into your detection alert pipeline in minutes, from controls to SIEM.

- **Rapid Gap Closure with Detection Rules**
  Deploy Sigma and Yara rules instantly to address detection gaps as soon as they're found.

ABOUT ATTACKIQ

AttackIQ, the leading independent vendor of breach and attack simulation (BAS) solutions, built the industry's first BAS Platform for continuous security control validation and improving security program effectiveness and efficiency. AttackIQ is trusted by leading organizations worldwide to plan security improvements and verify that cyberdefenses work as expected, aligned with the MITRE ATT&CK framework. AttackIQ is passionate about giving back to the cybersecurity community through its free award-winning AttackIQ Academy and partnership with MITRE Engenuity's Center for Threat-Informed Defense.
